

Expt-2:**Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.****AIM:**

To run a basic Word Count MapReduce program using Hadoop.

PROCEDURE:**1. Create Data File:**

```
nano word_count_data.txt
```

Example content for word_count_data.txt:

Hadoop is a framework that allows for distributed processing of large data sets.

2. Mapper Program (mapper.py):

```
import sys

for line in sys.stdin:

    line = line.strip()

    words = line.split()

    for word in words:

        print(f'{word}\t1')
```

3. Reducer Program (reducer.py):

```
import sys

current_word = None

current_count = 0

word = None

for line in sys.stdin:

    line = line.strip()

    word, count = line.split('\t', 1)

    try:

        count = int(count)

    except ValueError:

        continue
```

```
if current_word == word:
    current_count += count
else:
    if current_word:
        print(f'{current_word}\t{current_count}')
    current_count = count
    current_word = word
```

```
if current_word == word:
    print(f'{current_word}\t{current_count}')
```

4. Set Hadoop Environment:

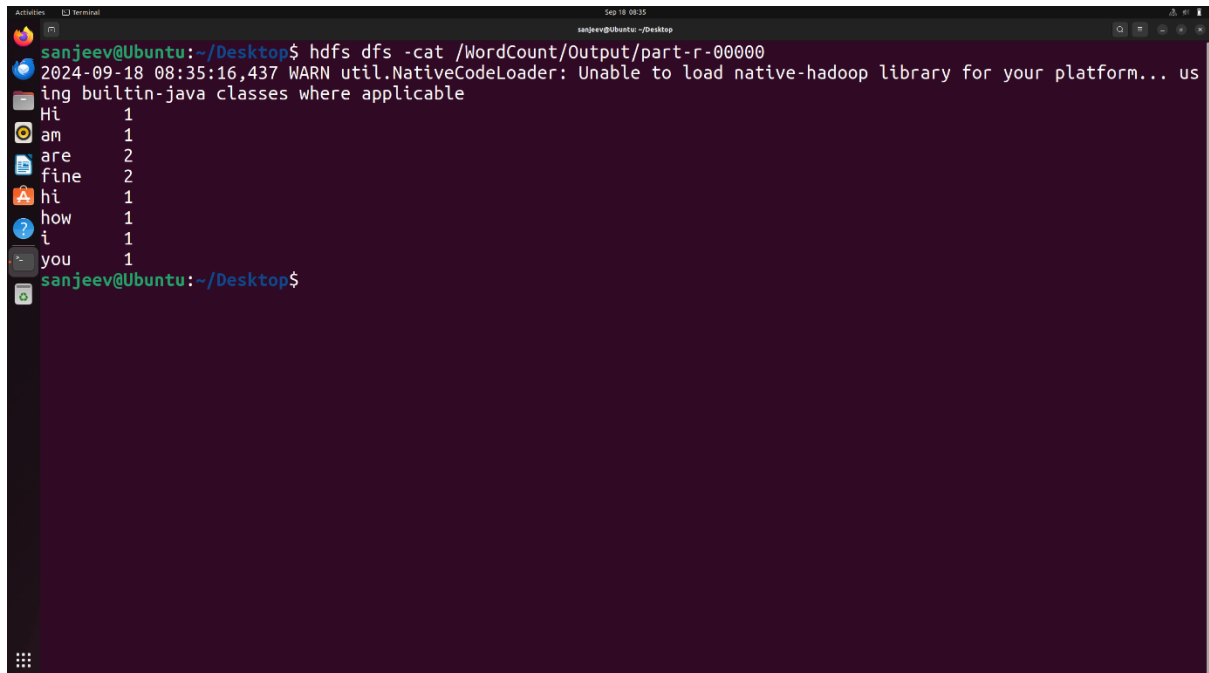

```
hdfs dfs -mkdir /word_count_input
hdfs dfs -copyFromLocal word_count_data.txt /word_count_input
```

5. Run Word Count Program:

```
hadoop jar $HADOOP_HOME/share/hadoop/tools/lib/hadoop-streaming-*.jar \
-input /word_count_input/word_count_data.txt \
-output /word_count_output \
-mapper mapper.py \
-reducer reducer.py
```

6. Check Output:

```
hdfs dfs -cat /word_count_output/part-00000
```

OUTPUT:A terminal window titled 'Terminal' with a dark background. The prompt is 'sanjeev@Ubuntu:~/Desktop\$'. The command 'hdfs dfs -cat /WordCount/Output/part-r-00000' has been executed. The output shows a warning message from 'util.NativeCodeLoader' and a list of words with their counts. The words and counts are: 'Hi' (1), 'am' (1), 'are' (2), 'fine' (2), 'hi' (1), 'how' (1), 'i' (1), and 'you' (1). The prompt 'sanjeev@Ubuntu:~/Desktop\$' is visible again at the bottom.

```
sanjeev@Ubuntu:~/Desktop$ hdfs dfs -cat /WordCount/Output/part-r-00000
2024-09-18 08:35:16,437 WARN util.NativeCodeLoader: Unable to load native-hadoop library for your platform... us
ing builtin-java classes where applicable
Hi      1
am      1
are     2
fine    2
hi      1
how     1
i       1
you     1
sanjeev@Ubuntu:~/Desktop$
```

RESULT:

Thus, the program for basic Word Count Map Reduce has been executed successfully.
